

ABOUT ME

Junior Fullstack Web Developer with strong teamwork experience. Since I entered the world of web development, I have become increasingly passionate and eager to continue learning. My previous experience in other industries has provided me with excellent communication skills and the ability to thrive in dynamic, high-pressure environments. Additionally, my engineering background has shaped me into a disciplined professional with a strong logical and analytical mindset, which I apply to everything I do.

Node.JS Nest.JS MySQL MongoDB

TESTING

Jest Vitest React testing library

IT EXPERIENCE AND KEY PROJECTS

METODOLOGIAS AGILE: SCRUM Y KANBAM

FEMCODERSCLUB WEB APP

Tecnologies: React Nest.js MySQL Tailwind CSS Jira

Rol: Scrum Master and Developer

Led development and Scrum processes for a platform managing members and events. As Scrum Master and developer, ensured agile workflow and built key features with React, Nest.js, MySQL, and TypeScript. Managed version control (GitHub), UI/UX (Figma), styling (Tailwind CSS), and task organization (Jira).

MOVE MATE

Tecnologies: React Nest.js MySQL Tailwind CSS Jira

Rol: Scrum Master and Developer

Move Mate is a comprehensive platform that streamlines the moving process, allowing users to plan, coordinate, and execute their moves seamlessly. During its development, I have learned to handle crisis situations and lead my team, strengthening my leadership and problem-solving skills.

MUSIC SCHOOL KIDS

Tecnologies: JavaScript TypeScript C Git Github Jira

Rol: Developer

Led the development of an interactive online music school platform featuring virtual instruments playable via keyboard and mouse. I implemented agile methodologies to ensure timely and efficient project delivery. Managed tasks and coordinated design efforts using Jira, optimizing team collaboration and workflow. This project enhanced my skills in clear communication, teamwork, adaptability, responsibility, and problem-solving, contributing to a successful and well-executed final product.
